*doc. dr. Gregor Veble
Vipavska c. 13, SI-5000 Nova Gorica, tel.: 05 365 35 17, fax: 05 365 35 27, e-mail: gregor.veble@ung.si*

INVITATION

We are inviting you to the public lecture given by

Prof. Dr. Miran Gaberšček

*(Director of Centre of Excellence for Low Carbon Technologies (CO NOT),
head of Laboratory for materials electrochemistry at National Chemistry Institute of
Slovenia, associate professor at Faculty of Chemistry and Chemical Technology of
University of Ljubljana),*

with the title

Materials for electric and hydrogen cars

*The lecture is a part of the »Scientific evenings« cycle of lectures
and will take place on Wednesday, **19 October 2010 at 7PM**
at the mansion Zemono near Vipava.*

*The moderator will be Dr. Matjaž Valant,
associate professor for the field of materials at the University of Nova Gorica.*

Low carbon technologies are becoming a serious alternative towards classical, fossil fuel based technologies. The goal is not only a reduction in atmospheric pollution, but also development of new materials, devices and systems. The lecture will be focused on new batteries to be used in electric vehicles, and on new materials that will lead towards better and cheaper fuel cells.

Kindly invited!
