

Open position for the Marie Skłodowska-Curie fellows at the Center for Cognitive Science of Language

The Center for Cognitive Science of Language is an interdisciplinary research center of the University of Nova Gorica. Our core expertise is in formal generative linguistics, which we use as a foundation for engaging in other domains of language-related cognitive science – especially language processing, language acquisition, bilingualism and the relation between language and other cognitive abilities. At the focus of our research are investigations of theoretically relevant syntactic and semantic/pragmatic aspects of different languages. We strengthen the reliability of our data and analysis assessments with the use of corpora, large judgment samples, and various behavioral experimental methods (e.g. sentence completion, reaction times, developmental tasks, eye tracking, ERPs). The Center possesses an EyeLink 1000 plus eye tracker and a 64-channel Brain-Products EEG system for ERP research. For more information about the research of our members consult their personal websites linked from the staff page of our Center's homepage at www.ung.si/ckzj/en.

Topic: Eye-tracking research on linguistic topic of candidate's choice

We are looking for a candidate to operate and perform experiments on our eye-tracking equipment. We will support any type of studies that fall within the broad research domains listed in the description of our Center above, but we can offer strongest support in certain syntactic topics that have been of interest to us, which includes the processing of agreement mismatches such as with hybrid nouns or coordinated subjects, or the processing of silent elements such as silent verbs (e.g. silent 'have') in sentences with Intensional Transitive Verbs.

Scientific requirements:

A PhD degree in linguistics, cognitive science, psychology or a related field. Demonstrated experience in eye-tracking research. Demonstrated experience in research on topics from the broad research domains listed in the description of our Center above.
