

Bibliography

1. **Self-assembly of polyhedral protein cages from pre-organised coiled-coil modules.**
Lapenta F, Aupič J, Vezzoli M, Strmšek Ž, Da Vela S, Svergun D, Jerala R. **Nat. Comm.** 2021 Jan (in press).
2. **Designed folding pathway of modular coiled-coil-based proteins.**
Aupič J*, Strmšek Ž*, Lapenta F, Pahovnik D, Pisanski T, Drobnak I, Ljubetič A, Jerala R. **Nat. Comm.** 2021 Jan (in press)
3. **Design of novel protein building modules and modular architectures.**
Lapenta F, Jerala R. **Curr Opin Struct Biol.** 2020 Jun 4;63:90-96.
4. **Design of fast proteolysis-based signaling and logic circuits in mammalian cells.**
Fink T, Lonžarić J, Praznik A, Plaper T, Merljak E, Leben K, Jerala N, Lebar T, Strmšek Ž, Lapenta F, Benčina M, Jerala R. **Nat Chem Biol.** 2019 Feb;15(2):115-122
5. **SwitCCh: Metal-site design for controlling the assembly of a coiled-coil homodimer.**
Aupič J, Lapenta F, Jerala R. **Chembiochem.** 2018 Dec 4;19(23):2453-2457
6. **Structure-Activity Relationship in Monosaccharide-Based Toll-Like Receptor 4 (TLR4) Antagonists.**
Facchini FA, Zaffaroni L, Minotti A, Rapisarda S, Calabrese V, Forcella M, Fusi P, Airoidi C, Ciaramelli C, Billod JM, Schromm AB, Braun H, Palmer C, Beyaert R, Lapenta F, Jerala R, Pirianov G, Martin-Santamaria S, Peri F. **J Med Chem.** 2018 Apr 12;61(7):2895-2909
7. **Coiled coil protein origami: from modular design principles towards biotechnological applications.**
Lapenta F, Aupič J, Strmšek Ž, Jerala R. **Chem Soc Rev.** 2018 Feb 5.
8. **Design of coiled-coil protein-origami cages that self-assemble in vitro and in vivo.**
Ljubetič A*, Lapenta F*, Gradišar H, Drobnak I, Aupič J, Strmšek Ž, Lainšček D, Hafner-Bratkovič I, Majerle A, Krivec N, Benčina M, Pisanski T, Veličkovič TČ, Round A, Carazo JM, Melero R, Jerala R. **Nat Biotechnol.** 2017 Nov;35(11):1094-1101.
9. **Towards designing new nano-scale protein architectures.**
Aupič J*, Lapenta F*, Strmšek Ž*, Jerala R. **Essays Biochem.** 2016 Nov 30;60(4): 315-324.
10. **Escherichia coli DnaE Polymerase Couples Pyrophosphatase Activity to DNA Replication.**
Lapenta F, Montón Silva A, Brandimarti R, Lanzi M, Gratani FL, Vellosillo Gonzalez P, Peticarari S, Hochkoeppler A. **PLoS One.** 2016 Apr 6;11(4)
11. **Simultaneous ternary extension of DNA catalyzed by a trimeric replicase assembled *in vivo*.**
Montón Silva A, Lapenta F, Stefan A, Dal Piaz F, Ceccarelli A, Perrone A, Hochkoeppler A. **Biochem Biophys Res Commun.** 2015 Jun 19;462(1):14-20
12. **HoLaMa: A Klenow sub-fragment lacking the 3'-5' exonuclease domain.**
Martina CE, Lapenta F, Montón Silva A, Hochkoeppler A. **Arch Biochem Biophys.** 2015 Jun 1;575:46-53

Patent contributions

- 1. A combination of split orthogonal proteases with dimerization domains that allow for assembly.** European Patent Application EP3526325
- 2. The method for improvement of responsiveness of cells to ultrasound and mechanical stimuli with gas vesicles and sensitised mechanosensors.** European Patent Application EP3523317
