

*Fakulteta za podiplomski študij / University of Nova Gorica, Graduate School
Študijski program Znanosti o okolju / Environmental Sciences Study Programme*

VABILO NA PREDAVANJE / INVITATION TO THE LECTURE

Opportunities for scaling clean energy and protecting our natural systems: How scientists, engineers, policymakers, and business leaders working together must create the energy future we need

Dr. Aimee Christensen

*Founder and Chief Executive Officer
of Christensen Global Strategies*

Četrtek, 14. 10. 2010 ob 16:00 / Thursday, 14. 10. 2010 at 16:00

*Predavalnica 201 Fakultete za znanosti o okolju, Križna ulica 3, Gorica, Italija /
School of Environmental Sciences, Lecture hall 201, Via della Croce 3, Gorizia, Italy*

Predavanje bo v angleščini / Lecture will be held in English:

As an US Embassy Green Tech Visiting Speaker in Slovenia, Dr. Christensen will speak about both the policies and measures we need to create a sustainable energy future, and the critical role that scientists and engineers play in technological development, and their role in educating policymakers, and working with business leaders to make the case for deployment of clean technologies, that they are ready and cost-competitive.

Vljudno vabljeni / Kindly invited!
